

What is F-Response?

F-Response is an easy to use, vendor neutral, patented software tool that enables "Live" forensics and eDiscovery over IP networks using the examiner's tools of choice. Physical memory, disks, and volumes of the machines under inspection appear on the examiner's machine as locally attached, read-only devices.

F-Response® provides read-only access to the full physical disk(s) and physical memory (RAM) of Microsoft Windows computers via the network.

F-Response significantly increases the efficiency and affordability of digital forensics, data recovery, and eDiscovery efforts by presenting a means to manage the forensic or eDiscovery process over any TCP/IP network.

Is F-Response Court Approved?

There is no such thing as court-approved software. Courts approve experts and their methods, and courts admit evidence. Evidence collected with F-Response® has been and continues to be used successfully in courts across the country and around the world. Because F-Response® works. Accurately. Securely. Verifiably.

How F-Response works:

F-Response creates an authenticated, read-only connection between the examiner's computer and the computer under inspection, over the network.

Why Use F-Response?

F-Response is inexpensive, flexible, vendor neutral, and does not require extensive training. Practitioners can learn to use it in a fraction of a day, and then fully leverage their existing arsenal of tools and training. Other network ready solutions are expensive, require considerable training to use, and force you to use the proprietary integrated vendor analysis tool.

F-Response is a Microsoft Winqual recognized Windows 7 Compatible Application. The Windows Logo is a registered Trademark of Microsoft.

F-Response Options:

F-Response® term licenses are sold on an annual basis with no limitation on the number of installations or uses. F-Response® product options are as follows:

- F-Response Enterprise** is a solution that permits many machines to be examined simultaneously over a network, and facilitates "stealthy" deployments for covert operation. F-Response target code is easily deployed and managed via the F-Response Enterprise Management Console (FEMC).
- F-Response **Consultant+Covert** (CE+C) has all the features of Consultant edition, plus a covert, Enterprise Edition push style, deployed target for use on any one machine at any given time.
- F-Response **Consultant** is a solution that permits many machines to be examined simultaneously. GUI-based target code is executed on each machine to be examined.
- F-Response **TACTICAL** is an intuitive, easy to use, GUI-based point solution that permits an examiner to review one machine at a time. A matched dongle pair facilitates the automatic connection between the Examiner and Subject computers.

F-Response Highlights:

- Forensically Sound & Secure:** The examiner cannot alter Metadata, files, or make any change to the machine under inspection because all write operations are silently ignored by F-Response.
- Supported Platforms:** Provides network accessible, authenticated, RAW, read-only drive access to most computers, including the following: Microsoft Windows (2000, XP, 2003, Vista, 2008, Windows 7, Windows 8) [32 & 64bit]; Apple OSX 10.3, 10.4, 10.5, 10.6, 10.7; Linux 32 & 64bit; HP UX11iv2 & HP UX11iv3 (Itanium); IBM AIX (Power5 & 6); Sun Micro-systems Solaris 8, 9, 10 (SPARC); OpenSolaris (Intel), FreeBSD 7+ (386), SCO Unixware 7 & OpenServer 6 (Intel).
- Versatile:** F-Response was designed to be completely vendor neutral. If your analysis software reads a hard drive, it will work with F-Response.
- Highly Efficient:** F-Response maintains a small active memory (RAM) Footprint and will not bog down the user's workstation or entity's network.
- Scriptable:** A language neutral fully scriptable COM object is available, allowing a technical user of F-Response Enterprise to script actions typically initiated manually in the FEMC.
- Affordable:** Fixed yearly license. No seat limits. No add-ons. No surprises.

F-RESPONSE PRODUCT COMPARISON MATRIX & PRICING

Capabilities	TACTICAL	Consultant	Consultant + Covert	Enterprise	Comments
Unlimited Installs	X	X	X	X	F-Response may be installed on an unlimited number of machines.
Unlimited Seats	X	X	X	X	F-Response may be shared among an unlimited number of examiners.
Simultaneous Connections	S	U	U	U	TACTICAL provides a single (one-to-one) connection. All other versions allow unlimited connections to F-Response targets.
Boot Disk Compatible	X	X	X	X	F-Response provides a boot CD that enables F-Response connections to "CD-booted" computers.
Secure Authentication	X	X	X	X	All F-Response Authentication is done using the industry standard CHAP v2.
Image Collection Support	X	X	X	X	Collect forensic images of files, drives, volumes and/or RAM using your imaging tool of choice.
Live Analysis Support	X	X	X	X	Conduct live analysis upon files, drives, volumes and/or RAM using your analysis tool of choice.
Physical Memory (RAM) Support	X	X	X	X	Physical Memory support is currently available for 32 & 64 bit Microsoft Windows products.
Windows Operating System Support	X	X	X	X	Microsoft Windows 2000, XP, 2003, Vista, 2008, and Windows 7 & Windows 8 (32 & 64bit).
Apple Operating System Support	X	X	X	X	Apple OSX 10.3, 10.4, 10.5, 10.6, 10.7
Linux Operating System Support	X	X	X	X	Linux distributions (2002+)
Other Operating System Support		X	X	X	HP_UX11iv2 & HP_UX11iv3 (Itanium); IBM AIX (Power5 & 6); Sun Microsystems Solaris 8, 9, 10 (SPARC); FreeBSD 7 (i386).
F-Response® Database Object Connector	X	X	X	X	Database Object Connector provides write-protected access to embedded Database file objects.
F-Response® Cloud Connector	X	X	X	X	Cloud Connector provides write-protected access to Cloud-based storage systems.
F-Response® Email Connector	X	X	X	X	Provides write-protected access to IMAP based email presenting it as a local read-only volume.
F-Response® Cloud Connector (Premium Services)		X	X	X	Includes support for Google Apps for Business and other Enterprise class Cloud Storage Services.
F-Response® Email Connector (Premium Services)		X	X	X	Includes support for Google Apps for Business, Office 365 Native Exchange, and other Enterprise class Email Services.
F-Response® Accelerator Compatible		X	X	X	Accelerator permits many Examiner computers to simultaneously connect to many Target computers.
Scriptable COM Object		X	X	X	A fully scriptable Microsoft COM object to automate various stages in the F-Response process.
Audit Log		X	X	X	Updates Windows Event log on license manager machine with login, logout, and connection messages.
Single Click Stealth Deployment			S	U	Deploy to Targets with a single click.
Optional Encryption for data in transit				X	F-Response offers 256-bit AES encryption for data in transit. Windows Vista or better required on Examiner.
1-Year License Pricing (USD) (Commerical)	\$520	\$1,580	\$3,170	\$5,290	An activated license dongle (Dongle pair for TACTICAL) is shipped to the customer for new purchases.
3-Year License Pricing (USD) (Commercial)	\$730	\$3,450	\$7,090	\$11,650	An activated license dongle (Dongle pair for TACTICAL) is shipped to the customer for new purchases.
1-Year Renewal Pricing (USD) (Commerical)	\$200	\$970	\$1,990	\$3,246	A license update file is emailed to the customer, along with simple update process instructions.
3-Year Renewal Pricing (USD) (Commerical)	\$400	\$2,750	\$5,670	\$9,250	A license update file is emailed to the customer, along with simple update process instructions.
