WHAT IS XRY?

AN INTRODUCTION TO MOBILE FORENSICS

XRY is a software application designed for Windows which allows you to perform a secure forensic extraction of digital data from a wide variety of mobile devices. Such as smartphones, GPS navigation units, 3G modems, portable music players and tablets like the iPad.

Extracting data safely from cell phones is a specialist skill; it's not the same as recovering information from computers. Mobile devices don't all share the same operating system or components. Most are proprietary embedded devices with unique configurations. What does that mean in terms of getting data out of them? In simple terms, it means it is very difficult to do.

XRY has been designed and developed since 2003 to make that process a lot easier for you, with support for thousands of different mobile device profiles straight out of the box. We supply a complete solution to ensure you get exactly the data you need. The built-in wizard guides you effortlessly through the process step by step to make it as easy as possible.

100% FOCUS ON FORENSICS

FAST EXTRACTION & DECODING

SECURE FORENSIC FORMAT

MSAB

XRY - THE UNIQUE DIFFERENCES

MULTIPLE EXTRACTION WIZARD

XRY includes a Multiple Extraction Wizard as standard. This feature allows you to examine up to three different mobile devices simultaneously. You can be 3 times more effective by speeding up the time to perform examinations securely and ensure the best use of your time and resources.

SECURE REPORTS

With XRY, a tamper-proof report is created in minutes which can easily be customized to your needs, including your organization references and logo. The generated report can be printed or burned to disc. Using XRY's export function, users are afforded a wide range of functionality to facilitate further distribution and analysis of the data.

LIFETIME WARRANTY

All new equipment supplied is covered by a standard 24 month warranty. In addition we offer the best warranty and support program in the business. Provided you maintain your software license without interruption; we will maintain the warranty on your MSAB hardware.

NEW CABLES

Everything you need is delivered to your doorstep. As part of the standard license we supply you free of charge with new XRY updates and cables in future releases of our software. Typically we put out 4 new updates a year with hundreds of new phones added in each release.

HELP FILES

Know in advance what you can and can't recover. We provide a help file for every single device we support. This searchable index document provides detailed information on precisely what is available from each device.

TRIAGE TOOLS

Our Watch List feature helps users in the office and the field. XRY has built-in Triage Setup tools, to show 'actionable intelligence' immediately. Our tools show users the results and highlight where action needs to be taken.

100% FOCUS ON FORENSICS

All of our solutions are designed from scratch to be true forensic tools. You can be confident that they are fit for purpose. In forensics you cannot trust what the device is saying – you have to verify it for yourself. XRY automatically generates an audit trail of the forensic process for peer review and allows for hash values and password protection to ensure the integrity of the data.

BEST SUPPORT FOR SMARTPHONE APPS

XRY has the capability to recover data from a wide variety of smartphone apps. We can recover VOIP call data, GPS mapping information and instant messaging logs. XRY is in a constant state of development as new devices and apps appear on the market and offers the highest level of support for apps today.
